GLOSSARY OF ABBREVIATIONS

Grant Numbers. Numbers for research grants (e.g., EY-00012-11) consists of a 2-letter code (EY) representing the organization supporting the project, followed by a 5-digit serial number (00012) and a suffix (-11) which indicates the number of years the grant has been active. Certain large program grants have been broken down into a series of subprojects dealing with different aspects of research, and the subprojects have been assigned sequential numbers which follow the continuation suffix in the basic grant number (EY-00523-13 0001, EY-00523-13 0002, etc.)

Contract Numbers. Numbers for research contracts (e.g., CB-33875-03) are also composed of a 2-letter code (CB) representing the supporting organization, and a 5-digit number. However, the first digit of this number (3) indicates the fiscal year in which the contract was awarded initially (1973), and the remaining four digits (3875) are the contract identification number. The suffix (-03), in the case of contracts, represents the number of modifications to the contract rather than number of years.
